

Manitoba P-9 (1926) [Arch.]

ONTARIO

A map of Winnipeg, Manitoba, showing the Red River and surrounding areas. The map includes labels for 'Winnipeg', 'Red River', and 'Manitoba'. It also shows the '100th Meridian' and '50th Parallel'.

NOTE: The townships and ranges of the Dominion Land Survey east of the geological meridian are shown on the Manitoba portion of the map. On the Ontario portion, grid squares four miles to a side, every four of which are enclosed by solid lines, have been used. These provide a ready method of referring to or locating features. The east and west sides of the squares are indicated by numbers and south letters, and have a distance of one mile varying from about 1" on the east side of the map to about 2" 38' at the Manitoba-Ontario Boundary. Any square is identified by giving its marginal numbers. (Only the even numbers are given on this map.) For example: Minaki will be found in square 24-25S, and Outbelt in square 38-36S.

Compiled from surveys and aerial photographs by the Topographical Survey of Canada in co-operation with the Royal Canadian Air Force
